

“USIP2-Environmental Reform of Mongolia “ will be finished by June,2006

Under Second Ulaanbaatar Services Improvement Project the Grant amounting 1.8 million dollar from Government of Netherlands was received for Ulaanbaatar city environmental improvement. Works aimed to increase city green facilities was planned and initial stage works were implemented and commissioned in October and November, 2005. Currently the final stage works such as construction of drainage, road and bridge are being implemented and will be commissioned within June of 2006.

In 2005 within the project the investment of 1.5 billion tugrug was made for renovation of city streets and parks, construction of irrigation system, extension and renovation of tree nursery, establishment of black currant tree grove in schools and kindergarten, planting berry trees and bushes in ger area household plots (**total of 4639 beneficiary households were participated**) and construction of flood protection drainage and bathhouse in **6 districts of UB city- Bayanzurkh, Bayangol, Chingeltei, Sukhbaatar, Songinokhairhan, Khan-Uul and Batsumber sum of Tuv aimag.**

We would like to appeal all city organizations and citizens to work their best for maintaining and expanding the constructed works, improving the city appearance and reducing air pollution.
